Three identical, high-magnification images of a single snowflake are arranged horizontally. Each snowflake exhibits a classic six-fold rotational symmetry, with six primary arms extending from a central point. The arms are further divided into smaller, feathery sub-arms, creating a complex, dendritic pattern. The snowflakes are white and appear to be resting on a dark, reflective surface, which creates a subtle reflection beneath each one. The background is a solid, deep black, which makes the intricate details of the ice crystals stand out.
